

PRESENTS

NEXUS Program Science Stream

Grades 11 - 12

- ✓ *Post-secondary preparation*
- ✓ *Fundamentals of Biology, Physics, Chemistry*
- ✓ *Inquiry-based learning via Superheroes*
- ✓ *University application booster*

Description

The NEXUS Program is designed for passionate post-secondary bound high school students. At NEXUS Science, participants will be guided on a deep and exciting exploration of fundamental concepts in Biology, Chemistry and Physics applied in the context of superheroes! Learners will explore how superheroes follow or break the laws of science to exhibit their superpowers, and design their very own superhero through an inquiry-based approach, backed and rationalized by scientific concepts. This course will provide participants with learning opportunities similar to those they will experience in university, college, and other post-secondary pathways. Additionally, this course will help students develop essential soft skills, including time management, problem-solving, self-directed learning and note taking.

Details: Thursdays 6:30 - 8:30 PM starting Oct 14 (12 weeks)

Cost: \$200.00 for 12 sessions

How To Register:

Visit www.mathstronauts.ca/Programs to register by **October 4, 2021**.
